LinkedIn | Portfolio

SUMMARY

– Curiosity driven Frontend Developer with 4 years of experience, specialising in developing (and occasionally designing) exceptional but simplified applications, websites and everything in between.

SIGNIFICANT HIGHLIGHTS

– Took part in the Research and Development team to come up with new ideas around innovative animation libraries resulting in acquisition of new clients.
– Built a website from scratch on Webflow (CMS platform) along with Javascript development to deliver requirements not supported by the CMS platform, independently delivering the project in 6 months.
– Creating a small scale ERP system for advisors within the company, giving them access to internal documents and reducing HR/ Management queries by 60%

EXPERIENCE

BAM STRATEGY

Frontend Developer   *2021 – Present*
UI Development Team

BAM is a team of forward-thinking individuals that are driven by passion to elevate different brands in new and exciting ways. UI Development Team's objective is to build, maintain and come up with new ideas in the web development space for our Fortune 500 clients like PepsiCo, P&G, 3M, and Reckitt.

Responsibilities:
- Utilised HTML, CSS, React and JavaScript to create responsive websites for clients.
- Ownership for frontend development deliverables across multiple brands within BAM Strategy.
- Worked in an Agile, collaborative environment to collect design requirements while closely working with business folks and clients, peer programming, and testing applications across pipelines.
- Maintained strict graphic standards and branding throughout multiple product interfaces.
- Collaborating with operations to help investigate and come up with resolutions for ongoing client issues based on severity level.
- Conducted research and assisted with new business scoping efforts, resulting in the acquisition of clients by prototyping showcases using latest technologies.

Technologies:
- React, THREE.js, GSAP, JQUERY
- REST APIs
- Javascript, ES6+, HTML, CSS, SASS, BOOTSTRAP, Git, WordPress, Drupal CMS, PHP, TWIG
- MAMP PRO, ADOBE PHOTOSHOP, ADOBE XD

Freelance Developer

Freelance Frontend Developer   *2018 – 2021*

Worked as a Frontend Developer for clients referred from job marketplaces like Indeed and LinkedIn. Provided services like frontend development and UI design for clients by finalising project requirements and delivering desired functionality for websites.

Responsibilities:
- Manage website development projects from initial design through completion, optimising all cross-browser and multi-platform compatibility.
- Work closely with programmers and clients to meet project requirements, goals, and desired functionality.
- Conduct training for clients on handling website content management systems.

- Implemented enhancements that improved web functionality and responsiveness.

Technologies:
- HTML/CSS, PHP, Bootstrap, Javascript, JQuery, React, GIT
- Firebase, Hubspot, Drupal, WordPress, Elementor, WooCommerce
- Adobe Photoshop, Adobe XD, Figma

Dealerpull

Responsibilities:
- Developing Frontend for the Automotive Software website using a CMS Platform called Webflow
- Writing custom code for the functionalities that did not exist in the Platform.
- Adding Dynamic Search to the Existing Articles in the CMS.

Technologies:
- Webflow, HTML/CSS, Javascript, JQuery, Hubspot

InforceLife

Responsibilities:
- Developing Frontend for the Financial Advisors website using Webflow CMS
- Created a small scale ERP System for Financial Advisors within the Company.

Technologies:
- Webflow, HTML/CSS, Javascript, JQuery, Firebase
